Direct Hay Weighted Average Report for week ending 6/16/2023

Volume			
	This Week	Last Reported (6/5/2023)	Last Year
Tons:			
Hay	3825	3825	50
Straw	25	25	25
Total	3850	3850	75

Please Note: The above volumes (tonnage, acres, and bales) listed on this USDA LPGMN report are for confirmed trades only, it does not include estimated volume (tonnage) for bids or offers to the trade.

Compared to last week: Alfalfa hay steady. Good demand for new crop hay, yet there is some resistance to price from dairy operators as milk prices around 15.00 per cwt are putting pressure on their margins. First cutting of alfalfa is complete, drought conditions are expanding in SE SD as temps have been hot and rains have been sparse. Rain in the forecast for the weekend which is greatly needed.
